

Your First 30 Minutes in Stocket

Welcome to Stocket. This guide walks new users through the three essential steps required to begin managing their herd. Most producers can complete these steps in approximately 30 minutes.

You need to finish each of the following three steps. Don't worry if you are not sure if you are organizing your herd 100% correct at this point, you can easily change things later if you feel the need to do so.

Perform the following in this order: Step 1 then Step 2 then finish with Step 3.

Step 1: Create Locations

Locations represent the physical areas on your farm such as pastures, paddocks, and hay fields. Groups are assigned to locations, so locations must be created first.

1. Profile
2. Profile Manager
3. Description
4. Add pastures/paddocks/hay fields
5. Enter your field details and add your paddocks as needed
6. Submit
7. Repeat to add each of your additional pasture/paddock/hay field

Field

Pasture/paddock/hay field name *

Number of acres *

Purpose of the field

Grass species *

Management level

paddock 1

Pasture/paddock/hay field name

Number of acres

Note: Only named paddocks will be saved

Submit

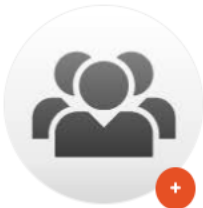

Step 2: Create Groups

Groups are collections of animals managed together. Examples include Cow Herd, Replacement Heifers, Bulls, and Weaned Calves, etc.

1. Manage
2. Animal
3. View & Edit groups
4. Add new group
5. Enter your group details
6. Submit
7. Repeat to add each of your additional groups as needed (can add or change later)

Step 3: Add Animals

Each animal should be assigned to a group when created. This allows Stocket to track inventory and management activities correctly.

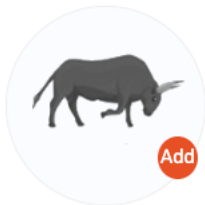

1. Manage
2. Animal
3. View & Edit Individual animals
4. Add new animal
5. Enter details for one animal in your herd
6. Save
7. Repeat this step to add each of your additional animals (can add or change later)

Title

Congratulations

You have completed the foundational setup of your Stocket account.

You are now ready to:

- Record breeding events
- Record pregnancy checks
- Record calving events
- Record health treatments
- Generate herd reports

As your operation changes, locations, groups, and animals can be updated at any time using the guidance provided in "[Managing Your Herd in Stocket](#)."
